

MARITIME CYBER SERVICES

Cyber Solutions Tailored to Your Maritime Challenges

For shipowners, shipyards, and port facilities, cybersecurity is different. Maritime cyber combines the challenges of IT and OT security and the demands of merging port infrastructure (cargo logistics, repair automation, physical security) with vessels at sea — where cyber expertise, connectivity, and bandwidth are limited.

Building an effective and compliant maritime cyber program, with the diverse and complex logistics of fleet and related infrastructure management, can seem overwhelming. The crew, cargo, and vessel safety, along with all your proprietary data, are constant targets for cybercriminals. Due to escalations in maritime cyber-attacks, resilient cybersecurity is now mandatory with the U.S. Coast Guard (USCG) Maritime Transpiration System Cybersecurity requirements and the American Bureau of Shipping (ABS) Cyber Resilience notations. Meeting maritime cyber challenges isn't just critical, it's required.

MARITIME CYBER HAS ITS CHALLENGES

EVERY CYBER CAPABILITY YOU NEED

As a provider of advanced capabilities in cybersecurity, Everforth™ ECS® tailors flexible, scalable, end-to-end maritime cyber solutions from powerful cyber, AI, and cloud technologies. We maintain **partnerships with leading technology providers** —with immediate reach-back capability and certified expertise — to deliver comprehensive, compliant cyber solutions that support your organization with 99.999% uptime.

Managed and Professional Maritime Cyber Services:

- Cybersecurity Officer (CySO)
- Virtual SOC
- Asset Inventory
- Penetration Testing
- Incident Response
- Network Segmentation and Access Controls
- Breach and Threat Detection
- Active Defense and Hunting
- Network Monitoring
- Audits and Assessments
- Training and Awareness
- Vulnerability Management
- Governance, Risk and Compliance
- 24/7 Security Incident and Event Management (SIEM)

ENLIST A CYBER LEADER THAT KNOWS YOUR MARITIME WORLD

With our deep understanding of **marine engineering and operations** and our comprehensive portfolio of **cybersecurity services**, Everforth ECS is uniquely positioned to build your maritime cyber program in full compliance with all federal and international requirements, aligning you for true cyber resilience.

Our certified IT and OT experts leverage years of federal experience to deliver managed security services across industries — for Fortune 500 companies and small to mid-size organizations.

We Protect Some of the World's Most Critical Networks:

Everforth ECS **manages cybersecurity** for the world's largest hospital ship, the United States Naval Ship Mercy.

ABOUT EVERFORTH ECS

From the boardroom to the battlefield, Everforth ECS empowers our clients' missions, amplifies impact, and drives lasting results with frontier technology solutions in AI, cybersecurity, cloud, and data platforms. Formerly known as ECS, the company remains focused on bringing the best of innovation to urgent mission needs across defense, intelligence, and federal civilian agencies. The company maintains partnerships with leading providers of AI, cybersecurity, and more, bringing proven, mission-ready commercial technology to the government when and where it matters most.

Contact us today to talk about building and maturing your maritime cyber solution.
